

Molecular Diagnostic Pathology

The Molecular Diagnostics Laboratory at Yale Pathology provides an extensive menu of diagnostic molecular tests using tissue and cytological specimens. Yale's Program in Molecular Diagnostics is continually adapting new discoveries and novel technologies for clinical use. Many of the tests being developed today are able to provide a molecular fingerprint that predicts the response of a disease state to specific therapies.

Jeffrey Sklar, M.D., Ph.D.
Professor of Pathology and Laboratory Medicine
Director, Molecular Diagnostics Program

José Costa, M.D.
Professor of Pathology and Medicine (Oncology)
Director, Translational Diagnostics
Director, Musculoskeletal Tumor Program

Pei Hui, M.D., Ph.D.
Associate Professor of Pathology
Director, Clinical Molecular Diagnostics Laboratory
