

## Cytopathology

The Yale Cytopathology Program operates a comprehensive laboratory that offers state-of-the-art facilities and equipment and a wide variety of testing procedures. The Cytopathology Service is responsible for rendering consultative reports derived from the examination of cytological preparations. These include samples for the screening of cervical cancer and diagnostic specimens obtained from biological fluids, scrapings, or by Fine Needle Aspiration (FNA). We also use modern molecular technologies to detect and type human papillomaviruses and to reveal molecular alterations characteristic of tumor cells.

**David Chieng, M.D.**  
Professor of Pathology  
Director, Cytology  
Director, Pathology Outreach

**Adebowale Adeniran, M.D.**  
Assistant Professor of Pathology

**Guoping Cai, M.D.**  
Assistant Professor of Pathology

**Akosua Domfeh, M.D.**  
Assistant Professor of Pathology

**Susan Fernandez, M.D.**  
Assistant Professor of Pathology

**Malini Harigopal, M.D.**  
Assistant Professor of Pathology

**Diane Kowalski, M.D.**  
Associate Professor of Pathology and Surgery (Otolaryngology)  
Director, Pathology Residency Program

**Angelique Levi, M.D.**  
Assistant Professor of Pathology
