

Women's Health Pathology

The Women's Health Program in Pathology at Yale offers world-renowned diagnostic and therapeutic services. Our **Breast Pathology** team provides diagnoses on biopsies in order to evaluate breast lesions detected clinically or by imaging studies. Therapeutic resections such as lumpectomies, mastectomies, sentinel lymph nodes, and axillary lymph node dissections are studied in detail to evaluate significant factors subsequently used to guide therapy. Our **Gynecologic Pathology** team receives diagnostically challenging cases from around the world, and performs not only routine evaluation of gross and microscopic specimens, but can carry out, when indicated, specialized electron microscopic, immunohistochemical, and sophisticated molecular studies.

Fattaneh A. Tavassoli, M.D.
Professor of Pathology and Obstetrics, Gynecology, and Reproductive Sciences
Director, Pathology Women's Health Program

Pei Hui, M.D., Ph.D.
Associate Professor of Pathology
Director, Gynecologic Pathology
Director, Clinical Molecular Diagnostics Laboratory

Veerle Bossuyt, M.D.
Assistant Professor of Pathology

Natalia Buza, M.D.
Assistant Professor of Pathology

G. Kenneth Haines, III, M.D.
Associate Professor of Pathology
Director, General Surgical Pathology Services
Associate Director, Pathology Residency Program
Co-Director, Medical Studies

Malini Harigopal, M.D.
Assistant Professor of Pathology

Sihem Khelifa, M.D.
Assistant Professor of Pathology

Ozlen Saglam, M.D.
Assistant Professor of Pathology
