

Oral and Maxillofacial Pathology

The Yale Oral and Maxillofacial Pathology Program offers comprehensive diagnostic services on biopsy and cytology specimens. Area of expertise are oral squamous cell carcinoma, odontogenic cyst and tumors. We offer a complete consultation service. The service is run by a Board Certified Oral and Maxillofacial Pathologist and has the clinical support of the multiple subspecialties at Yale School of Medicine and Department of Pathology. Our cytopathologists are actively involved and have extensive experience in maxillofacial pathology.

Christel Haberland, DDS, MS
