

## Women's Health Pathology

The Women's Health Program in Pathology at Yale offers world-renowned diagnostic and therapeutic services. Our **Breast Pathology** team provides diagnoses on biopsies in order to evaluate breast lesions detected clinically or by imaging studies. Therapeutic resections such as lumpectomies, mastectomies, sentinel lymph nodes, and axillary lymph node dissections are studied in detail to evaluate significant factors subsequently used to guide therapy. Our **Gynecologic Pathology** team receives diagnostically challenging cases from around the world, and performs not only routine evaluation of gross and microscopic specimens, but can also carry out specialized electron microscopic, immunohistochemical, and sophisticated molecular studies.

**Fattaneh A. Tavassoli, M.D.**  
Professor of Pathology and Obstetrics,  
Gynecology, and Reproductive Sciences  
Director, Pathology Women's Health Program

**Pei Hui, M.D., Ph.D.**  
Professor of Pathology  
Director, Gynecologic Pathology  
Clinical Director, Molecular Diagnostics Laboratory

**Veerle Bossuyt, M.D.**  
Assistant Professor of Pathology

**Natalia Buza, M.D.**  
Assistant Professor of Pathology

**Shweta Chaudhary, M.D.**  
Instructor in Pathology

**Susan Fernandez, M.D.**  
Assistant Professor of Pathology

**Malini Harigopal, M.D.**  
Associate Professor of Pathology

**Peter Humphrey, M.D.**  
Professor of Pathology  
Director, Genitourinary Pathology

**Ugur Ozerdem, M.D.**  
Instructor in Pathology

**Serena Wong, M.D.**  
Instructor in Pathology
